Subject: Fw: a voter should identify him/herself. they do it at motor vehicle and at banks
public comment on federal register

Subject: a voter should identify him/herself. they do it at motor vehicle and at banks

the disabled person must correctly identify him/herself at least once every 5 years with duly approved identification, his handwriting should be on file and his address. maybe a copy of his id should be in the records too. he does need to be recognized as an authorized person who has identified as an american citizen in order to vote. this country has a lot of sneaking lawbreaking foreigners running around all over america courtesy of joe biden simpleton. poor people may not have a car to get to polls but they may have a bike, or scooter or motorcycle, they also can vote by mail, our election official sends out a ballot and a return envelope so what is the problem in voting. we just need to make sure those who count the votes are honest and not robbers and thieves. this comment is for the public record. please receipt. jean public jean
